## DETAILED ACTION

### *Drawings*

This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Pingleton et al. in Patent No. 5,312,432.

Note Pingleton figure 2, an apparatus comprises of: a primary arm (128) having a first end and a second end; a secondary arm (129) is mounted on the primary arm for longitudinal movement; a pushing member (136, 120) is pivotally connected to an intermediate point of the primary arm and pivotally connected to one end of the secondary arm (129). Note column 4, lines 11-40). The teeth on pushing member (120) can be considered as suture receiving hole since they are capable of receiving a suture.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Patent No. 5,387,221 discloses a needle driving device having two arms and a link connected to two arms.

Patent No. 5,383,877 discloses a suturing instrument.

Patent No. 5,304,185 discloses a needle holder.

Patent No. 5,318,528 discloses a forceps.

Patent No. 5,432,390 discloses a forceps.
